## FREE SEMINAR NOV. 18<sup>TH</sup>

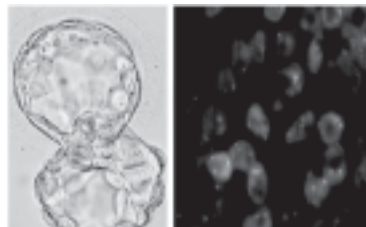

A free patient educational seminar is scheduled for Saturday, November 18th at 10:00 am. The location is The Renaissance Hotel, 1230 S Pine Island Rd in Plantation, 954-472-2252. You will have an opportunity to learn about current options in fertility therapy, the latest advances and our center's success rates. For directions and to RSVP please, contact our offices by November 16th at 1-866-246-CARE, or via e-mail at info@care-life.com. SPACE IS LIMITED All pre-registered attendees are eligible for a free consultation within 45 days.

## IVF-EGG FREEZING STUDY

Freezing of eggs is an important option to be considered by women. We are proud to be among the first centers providing this fertility preserving service to the South Florida community. For qualified patients considering IVF treatment who may be interested in participating in our IVF-Egg Freezing study, many benefits apply such as fertility medications and services. Our assisted reproduction laboratory is one of a few in the country with experience utilizing ultra-rapid freezing methods for unfertilized human eggs. For information and qualifications please contact our office.

## NEW AFFILIATION WITH TYHO-GALILEO RESEARCH NETWORK

We are proud to announce our center's affiliation with the Tyho Galileo Research Laboratories Network. This is an organization of leading scientists and physicians partly responsible for establishing the current clinical standards in human reproductive medicine and devoted to stimulate steady progress in the areas of reproductive medicine, human pre-implantation embryology and genetics. We are excited to be part of such a prestigious organization;

supporting reproductive medicine research will ultimately benefit our patients by allowing us to sooner implement the latest advances in the field.

## FULL REFUND PROGRAM AVAILABLE

A full refund (100%) financial option for qualifying couples undergoing IVF if a baby is not born after completing up to 6 IVF attempts is now available (up to 3 fresh and 3 cryopreserved treatment cycles). Women up to 40 years of age may qualify for this program. Please inquire for additional details.

## SCREENING THE EMBRYO FOR GENETIC CONDITIONS

Preimplantation Genetic Diagnosis (PGD) technology can identify embryos affected by a genetic condition at a very early stage of development. PGD for genetic conditions increases the probability of achieving a pregnancy that is unaffected by the specific disease tested. As reported in the September 3rd 2006 edition of the NY Times, "a growing number of couples are crossing a new threshold for parental intervention in the genetic makeup of their offspring: They are using PGD to detect a predisposition to diseases that may or may not develop later in life". The number of genetic conditions for which embryo screening can be of benefit continues to grow steadily as DNA probes specific for new conditions are developed. For additional information on PGD please contact our office.

## WELCOME Dr. Goldin

Dr. Jennifer Goldin, the newest member of our team of professionals, is a Psychologist with several years' experience specializing in providing emotional support and evaluation for couples undergoing fertility therapy. Dr. Goldin obtained her Ph.D. at Emory University in Atlanta, GA, and completed post-doctoral residency training at the Renfrew Center in Miami, FL.

## EGG DONATION PROGRAM

We are actively recruiting highly qualified egg donation candidates. We have a pool of eligible candidates that have all been pre-screened for their medical and psychological suitability. For additional information on our egg donation program, please contact our office at 954-584-2273.
